Water

Pawns are drowning when they step on water squares .

Pieces of Carrier class can take them on water squares .

When piece of Carrier class is taken ,Pawns on it will drown .

Player can take Lifebuoy power up and pawns are immune to water squares .

Move types

colours (behaviour)

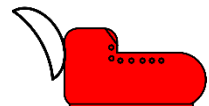

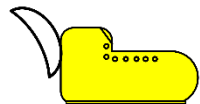

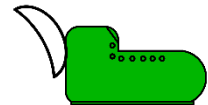

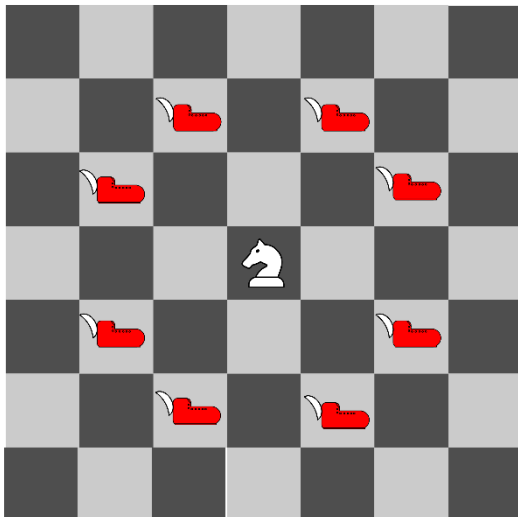

Green – move only

Yellow – take only

Red – take and move

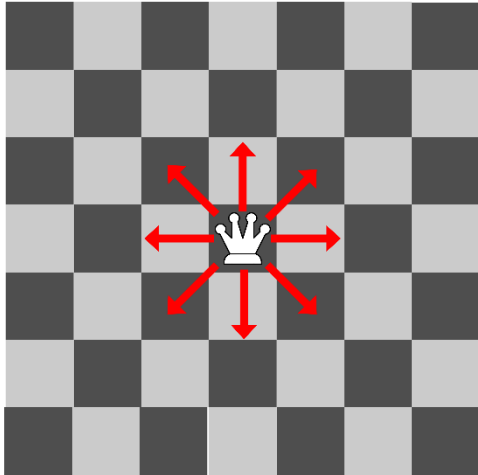

Jump Moves

Teleportation of your piece to targeted square ,

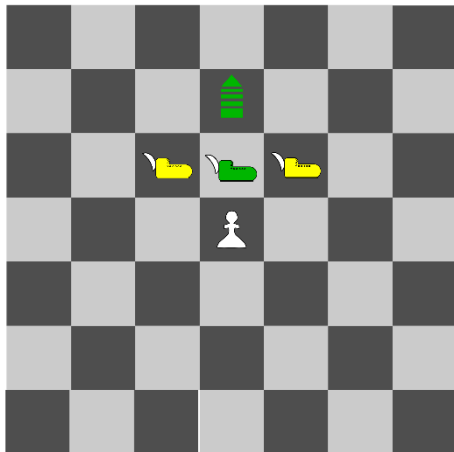

Repeat Moves

Blockable infinite range move .

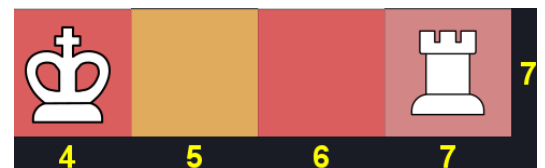

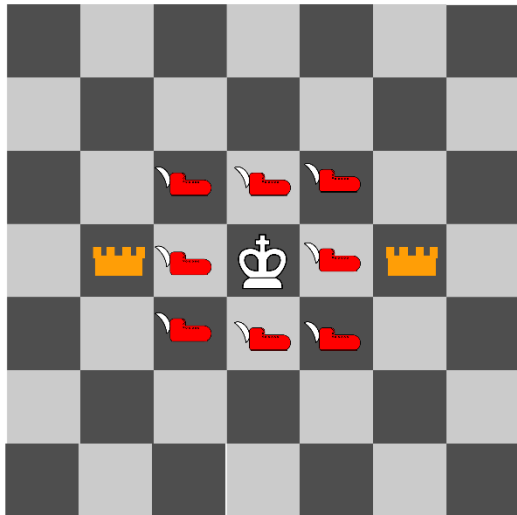

Big Moves

Between targeted and starting position can not be pieces in line .

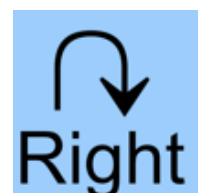

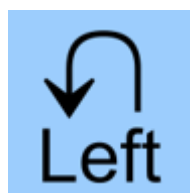

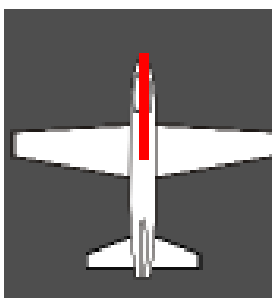

Castle Moves

Special move that switches King and Rook .

Rotate Moves

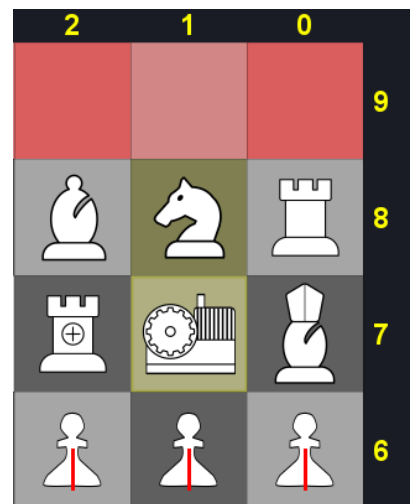

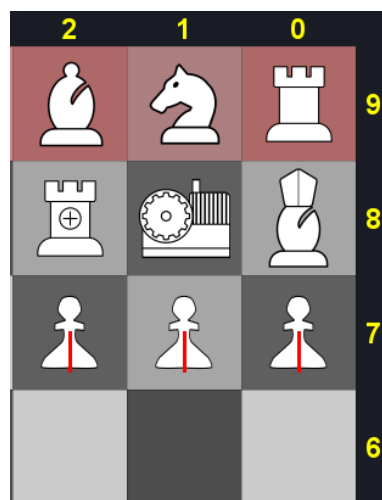

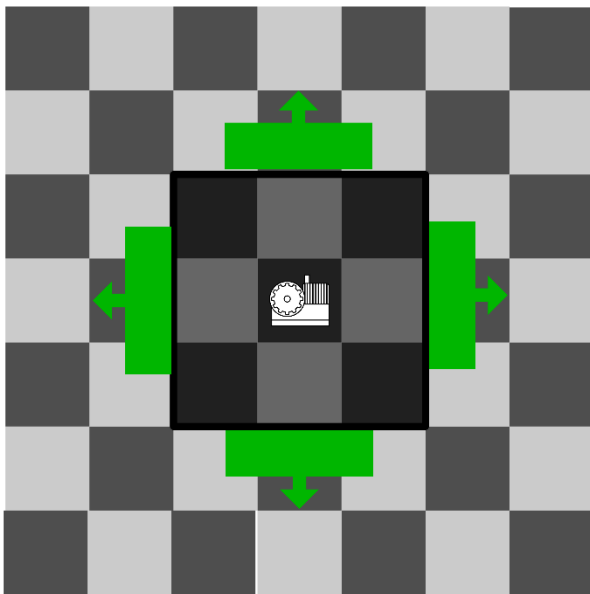

You can click on rotatable piece , if arrows change colour on right side of board ,you can click on them and it change orientation of piece . You can also press arrows on keyboard to change orientation . Orientation is displayed on piece with tic mark .

Carrier Moves

Special move of carrier class pieces .

If there is no piece on multiple squares in direction of move ,then moves carrier and multiple pieces on it .

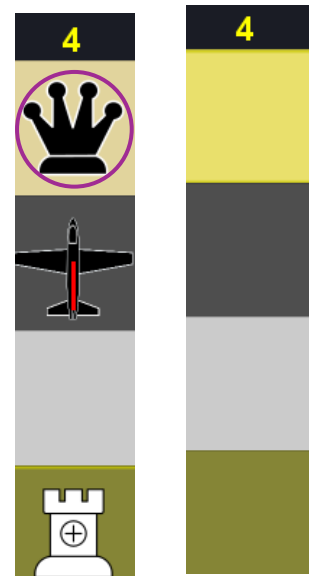

Linebreaker Moves

Infinite range blockable moves .

If there are 2 neighboring pieces in line , you can use this move . Its on more distant piece .

If you use this move ,your pice will destroy itself and destroy both enemy pieces .

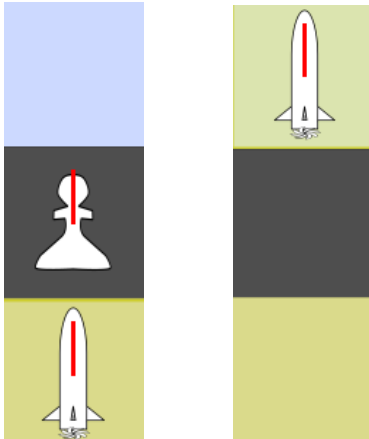

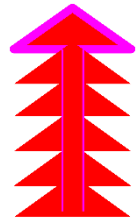

Torpedo Moves

Targeting line move .

If there are some pieces between starting
and targeting squares they will be taken .

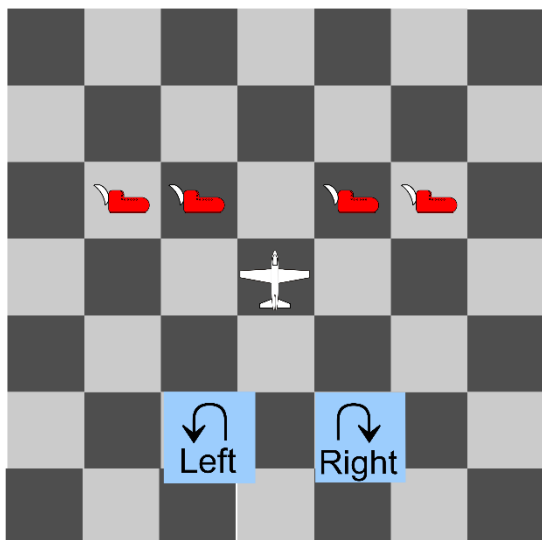

Also be taken your pice because this is friedly fire move .
